Company Name : Aerojet Rocketdyne

Company Sector : Aerospace and Defense

Operating Geography : United States, North America, Global

About the Company :

Aerojet Rocketdyne is an American aerospace and defense company that provides propulsion systems, warheads, and missile defense systems to both the government and commercial markets. The company was formed in 2013 when Rocketdyne was acquired by Aerojet. Aerojet Rocketdyne has a long history in the aerospace industry, dating back to 1942 when Aerojet Engineering Corporation was founded in California. Since then, the company has played a key role in the development of numerous space and defense programs, including the Apollo program, the Space Shuttle program, and the Mars rover missions. Today, Aerojet Rocketdyne is focused on developing advanced propulsion systems for a range of applications, including space exploration, missile defense, and hypersonic flight. The company also provides engineering, manufacturing, and test services for its products, and has facilities in several locations across the United States. As of early 2023, the company employed over 5,200 people. The company won Manufacturing Leadership Award in the "Engineering and Production Technology Leadership" category from the National Association of Manufacturers.

The USP of Aerojet Rocketdyne lies in its experience and technology having been contributed to the success of many missions, including NASA's Mars missions and the International Space Station, among others. Its mission statement reads, "To provide a full range of propulsion and power systems for launch vehicles, satellites and other space vehicles; strategic missiles; missile defense; and tactical systems and armaments."

Revenue :

US\$2,237.6 million – FY ended 31st December 2022 (YoY growth 2.3%)

US\$2,188.0 million – FY ended 31st December 2021
