**Company Name :** Wacker Chemie AG

**Company Sector :** Chemicals

**Operating Geography :** Germany, Europe, Global

**About the Company :** Wacker Chemie AG is a German multinational chemical firm headquartered in Munich, Germany. The firm was established by Alexander Wacker in 1914. The company has over 25 manufacturing facilities in Europe, Asia, and the Americas. The majority of Wacker Chemie AG's products are made from two primary raw materials: silicon and ethylene, which are divided into five divisions. Siltronic manufactures wafers for the semiconductor industry. Wacker Polysilicon manufactures ultra-pure polysilicon for use in semiconductors and solar wafers. Wacker Silicones caters to a wide range of industries, including construction, automotive, paints, textiles, and paper. Wacker Polymers, which began with ethylene, primarily serves the building industry with redispersible powders and a variety of other industries with dispersions. Wacker Biosolutions focuses on serving customers through biotechnological processes. On 31 March 2021, the company announced that The European Union has approved the production of a 20-megawatt electrolysis plant with Linde GmbH to develop green hydrogen and sustainable methanol production complex at its Burghausen site.

Wacker Chemie AG's Unique Selling Point or USP lies in being the world's second-largest silicon producer and the global leader in polymer binders and hyperpure silicon in the solar and semiconductor industries. Wacker Chemie AG's vision statement reads, " "As an innovative chemical company, WACKER makes a vital contribution to improving people's quality of life around the world. We want to continue developing and supplying solutions that meet our expectations of adding value for our customers and shareholders, and growing sustainably".
